Jl H.Muin 1 Kec. Cimanggis, Kota Depok

Information Systems graduate with experience in IT Support and Manual QA, with an interest in Cybersecurity. Experienced in IT troubleshooting, network monitoring, application testing, and defect reporting. Currently building cybersecurity skills through hands-on labs and training focused on security fundamentals, log analysis, SIEM, and threat detection. Interested in growing in IT Security, SOC Operations, and System Administration roles.

Pengalaman Kerja

PT. Lawu Cakra Sarana - Depok	Jan 2023 - Dec 2023
<i>IT Support</i>	
• Provided technical support for Windows-based PCs, laptops, printers, and network devices. • Troubleshoot hardware, software, and network connectivity issues to minimize operational downtime. • Managed user accounts, access permissions, and application support for end users. • Monitored network performance and system availability to maintain business continuity. • Supported endpoint security through antivirus management, operating system patching, and routine security maintenance.	
PT. Adidata Informatika - Jakarta, Indonesia	Aug 2026 - Sekarang
<i>Manual QA Tester - Bank Mandiri</i>	
• Performed manual testing based on available requirements and test cases. • Conducted functional testing, regression testing, and retesting of application features. • Reported and tracked bugs and defects using Jira. • Validated application data and business flows to ensure they matched the requirements. • Worked with QA and development teams to discuss testing results and reported defects. • Applied basic knowledge of SDLC, STLC, Agile, SIT, UAT, and defect lifecycle. • Performed basic input validation checks during the testing process.	

Pendidikan

SMAN 13 DEPOK - Depok, West Java, Indonesia	Jul 2014 - May 2017
Universitas Gunadarma - Jakarta, Indonesia	Aug 2018 - Mar 2023
<i>Bachelor of Sistem Informasi, 3.17/4.00</i>	

Project & Organisation

FIKTI Faculty Futsal Club - Depok	Nov 2018 - Nov 2021
<i>Member</i>	
• Actively participated in faculty-organized internal and external events. • Supported the execution and coordination of organizational programs and activities. • Engaged in regular weekly futsal training and team-building activities.	
Web Application Development – Food & Beverage Ordering System - Depok	Sep 2020 - Sep 2021

Web Development

- Designed and developed a web-based food and beverage ordering application to streamline the ordering process and improve user experience.
- Implemented key features including menu catalog management, online ordering, user authentication, and administrative controls.
- Built the frontend using HTML, CSS, and JavaScript, while integrating a MySQL database to manage customer, menu, and transaction data.

Websites Project - Depok

Feb 2024 - Jul 2024

Web Development

- Developed and maintained responsive websites for cryptocurrency projects using HTML, CSS, JavaScript, and React.
- Designed modern and user-friendly landing pages to enhance user engagement and accessibility.
- Integrated third-party APIs to display real-time cryptocurrency pricing and market data.
- Collaborated on presenting project information, token utilities, and ecosystem updates through web-based platforms.
